

# Time to Change Your **Power** Steering Fluid?

Utilizing the right power steering fluid for your vehicle is crucial. Most manufacturers offer a specific type of fluid that is designed for their specific power steering system and mixing fluids can cause damage to seals and components. The Edelmann Elite™ Universal Full Synthetic Fluid covers most manufacturer requirements with just one product.

The Edelmann Elite fluid is scientifically designed with superior anti-wear synthetics to protect critical system components and help prevent the need for premature repairs.

**Full Synthetic**  
*To protect the system*

Our fluid is approved and compatible with most manufacturer's requirements and other fluids on the market. This includes use of the fluid for top-offs.

**Universal Use**  
*Most vehicles in operation*

The fluid additionally protects and conditions seals and hoses to prevent system leaks and minimize pump squealing caused by air creeping into the system.

**Better Performance**  
*Condition rubber material*

Regardless of temperature, our Elite fluid maintains excellent fluidity and performance with operating temperatures of -58° F to +400° F, far exceeding other fluids in the market.

**Temperature Range**  
*Operate under any condition*
