

NEW Racks | Pumps | Gears

The Edelmann Elite™ power steering program represents a step up in quality and performance over typical aftermarket brand power steering hard parts and is built to meet or exceed OE specifications for fit, form, and function. Designed to outperform remanufactured parts in both quality and reliability, Edelmann Elite delivers application coverage not available in a new product in the aftermarket and is priced to provide a competitive option over OE dealer sourced parts.

Reduce Warranty Claims

No Core Hassles

100% NEW, never reused or remanufactured parts

Designed to overcome known OE design flaws

Improved packaging to reduce damage

100 Year / 1,000,000 Mile Warranty

EDELMANN ELITE

NEW Racks | Pumps | Gears

Every part receives a unique **Designated Numeric Asset™ (DNA)** identification number, which verifies its authenticity and corresponds to a **100% test inspection report** that is included with the product to confirm its level of quality. This unique numeric ID is **etched into each part**, making it easier to **avoid warranty hassles** caused by unqualified claims, fraudulent parts swaps, and untraceable returns.

Every rack, pump, and gear box is designed, developed, quality built, and 100% tested by Plews & Edelmann. Each part is painstakingly engineered to not only eliminate commonly experienced failures caused by OE design, but also improve upon the original design and incorporate the latest OE revisions and enhancements.
