

COMMITMENT TO QUALITY

Edelmann® has been providing the industry with a commitment to quality for over 100 years. We continue to offer the most comprehensive line of automotive fittings and we are ever expanding the category to make sure our customers have access to everything needed to better serve the market. Recently, we released a new catalog with some of these expansions and we want to highlight some of the great products that we introduced and some that we continue to offer as a benefit to our customers.

Our new catalog adds 13 additional dealer fitting assortments for a total of 21 assortments featuring the most sought after sizes and combinations in a convenient, labeled case. The fitting assortments vary across a wide range of standard and metric applications and provide a great selection of pieces, in both large and small quantities depending on your specific needs.

An Intelligent Selection. We can help select the right product mix for your market. We use regional sales data to tailor a selection of products that best suits your particular market needs. The resulting selection gives you the highest opportunity for sales and customer satisfaction.

An Intelligent System. The products in our assortment collection are divided into six major categories. Each category has a color code for quick reference coordinated with the display on our cabinet. That makes it easier to find the products in the display and in the catalog.

An Intelligent Cabinet. The 405 cabinet takes up less than four square feet of floor space, yet delivers over 20 square feet of display area. It's 45" wide, 12" deep and 77" high including the header sign. It features sturdy steel construction. Available with a product load or empty, based on your needs.

An Intelligent Drawer. Each drawer has a color-coded label which features an illustration, a part number and size information. There's no need to open the drawers to find the part you're looking for. A divider makes it possible to separate bagged inventory from loose parts.
